## 4) Troubleshooting

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Reasons</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Batteries too hot/cold</td>
<td></td>
<td>A battery must be from 50-104ºF (10-40ºC) to charge. Charging will resume when the battery gets back to its specified temperature range.</td>
</tr>
<tr>
<td>Wrong battery type</td>
<td></td>
<td>If the wrong type of battery is placed in the charger, it will not charge. Make sure the correct battery type is used. <strong>ONLY USE BATTERIES PROVIDED BY MAGNETEK!</strong></td>
</tr>
<tr>
<td>Battery contacts are dirty or damaged</td>
<td></td>
<td>Inspect battery contacts. If dirty, wipe with Isopropyl alcohol. <strong>DO NOT SUBMERGE.</strong> If damaged, replace battery pack.</td>
</tr>
<tr>
<td>Battery has not indicated full charge in allotted time</td>
<td></td>
<td>Various environmental conditions may elicit the charger to fail to recognize a full charge condition. In this case, the charger will stop charging after a pre-programmed time and indicate a fault. If this happens repeatedly contact, Magnetek Inc. as the charger may require service.</td>
</tr>
<tr>
<td>Charger too hot/cold</td>
<td></td>
<td>Re-locate charger to an environment that does not exceed 50-104ºF (10-40ºC).</td>
</tr>
</tbody>
</table>

**Table 1.0**

**Conditioning:** A new rechargeable battery pack may experience a low usable capacity during the first few charge cycles due to long storage. This is normal. Battery capacity will be restored after several full charge/discharge cycles.
3) MULTIPLE CHARGERS (Max. 2)

1. **You can only use up to two chargers with one power supply.** Using more will damage the charger and/or power supply. This will also void the warranty.

2. Plug charger power supply adapter into 120 VAC 60 Hz power source. Plug the adapter jack in the charger base connection labeled “IN”. The “POWER” light will come on BLUE, indicating the unit is receiving power.

3. In the charger that has the power supply adapter, plug the parallel cable (178-00203) in that charger base connection labeled “OUT”.

4. In the next charger, plug the other end of the parallel cable into the charge base connection labeled “IN”. The “POWER” LED will light BLUE, indicating the unit is receiving power.

---

**BATTERY CHARGERS:**

- 195-50363-0010: Battery Charger w/AC Power Adapter for BT128-0 battery
- 195-50363-0020: Battery Charger w/DC Power Adapter for BT128-0 battery
- 195-50363-0030: Battery Charger w/parallel cable for BT128-0 battery
195-50362-0010: Battery Charger w/AC Power Adapter for BT126-0 battery
195-50362-0020: Battery Charger w/DC Power Adapter for BT126-0 battery
195-50362-0030: Battery Charger w/parallel cable for BT126-0 battery

3. Once in place, the Status LED will turn RED, indicating the battery is charging.

4. When the battery is fully charged, the Status LED will turn GREEN. The battery will be charged within 3 hours.

5. If an error has occurred with the charging process, the Status LED will flash RED. Remove the battery from the charger and try again. (See Table 1.0 for more troubleshooting instructions)

6. For best battery performance, avoid charging the battery pack for more than 24 hours at a time.

Note: All new rechargeable battery packs must be charged before usage.
• Recharging a battery only after it is fully discharged will prolong its life.
• Avoid recharging battery when fully or near fully charged.

2) Single Charger Instructions

1. Plug the provided power supply into the IN power jack as shown in Figure 2. The “Power” LED will turn blue, indicating the unit is receiving power.

2. Insert the battery into the slot until the battery settles firmly in place. The battery label MUST be facing upward with the tab facing out, as shown in Figure 3.

1) Warnings and Cautions

WARNING, CAUTION, and Note statements are used throughout this manual to emphasize important and critical information. You must read these statements to help ensure safety and to prevent product damage. The statements are defined below.

WARNING

WARNING indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.

CAUTION

CAUTION indicates a potentially hazardous situation which, if not avoided, could result in minor or moderate injury. It may also be used to alert against unsafe practices.

Note: A note statement is used to notify users of installation, operation, programming, or maintenance information that is important, but not hazard-related.
WARNING

- This manual includes instructions regarding the safe operation of the Magnetek 195-50362/195-50363 series of battery chargers. If you ignore these instructions you are assuming responsibility for damages, costs, or injury incurred by such disregard.

- These battery chargers contain no customer serviceable parts. Opening or tampering with the internal electronics will void the manufacturer's warranty.

- Do not make any changes or modifications to the charger unit. Failure to comply will void the manufacturer’s warranty.

- Do not attempt to open a rechargeable battery pack. The pack has been permanently sealed at the factory and contains no serviceable parts. If the pack has been damaged in any way, immediately cease use of the battery pack and dispose of it in accordance with all applicable regulations.

CAUTION

- Please familiarize yourself with these instructions before attempting to use.

- Use of these devices is intended ONLY for BT128-0 and BT126-0 rechargeable battery packs.

- Do not attempt to charge alkaline or other non-rechargeable batteries.

- Do not expose batteries to excessive heat or fire. Failure to do so could lead to an explosion and cause serious personal injury.

- Do not charge batteries or operate the charger in a hazardous environment.

- Do not short circuit battery or charger terminals.

- Do not attempt to charge a damaged battery.

- For indoor use only. The charger unit is not intended for outdoor use.

- Keep the environment between 50-104°F (10-40°C) during charging operations. Do not operate charger in direct sunlight or close to a heating source.

- Do not store batteries in the charger.

- Store batteries between 0-85°F (-20-30°C)

- Always dispose of used batteries in accordance with appropriate regulations.

- Use only with approved Magnetek products. Not for use with other manufacturer's products. Do not attempt to manually discharge battery packs.

General Suggestions:

- For the longest battery life, rechargeable batteries should be recharged at least every 6 months, even when in storage.

- For best performance of the battery, avoid charging the battery pack for more than 24 hours at a time. Failure to do so may negatively impact battery life.
